Hi Jeff,

I am on vacation and will respond next week.

Best Regards,

Scott

On May 16, EPA attorney, Cliff Villa, received an email from Barry Ziker stating:

“It is our belief that Argus Pacific should work with Fulcrum and iRS both with respect to the identification, handling, and disposal of asbestos containing material during the high school demolition project, and regarding assessment at the Site. Scott has, accordingly, spent time this week reviewing documents and compiling a list of questions and comments for Fulcrum and iRS to clarify some of the information in the documents.

• Scott will meet with Fulcrum and iRS as soon as his review is complete and will reach out to Jeff to meet and discuss this review and the proposed scope of a Site assessment.”

Can you tell us when you anticipate this document review to conclude? Also, will you share with us the questions and comments you have regarding the work completed by Fulcrum and iRS? I assume the questions and comments are, at least in part, the reason you have not contacted us to discuss a work plan and would appreciate knowing the nature of those questions/comments.
